

BUCKET AUGER HEADS

These stainless steel bucket augers with high-carbon bits are extremely durable which allows deeper depths. The augers are available in three different types. The regular type **E1051** thru **E1055** are designed for use with ordinary soil sampling. The mud type **E1056** thru **E1060** are designed for sampling heavy, wet soil or clay samples the opening allows easy removal of wet samples. The sand type **E1061** thru **E1065** are designed for use with dry, sandy soils. The auger heads create holes 3/8" to 3/4" larger than the bit diameter. A 4 ft. seamless extension and cross handle are available for these augers
